Status Due diligence underway

GINKGO Planning and Design Inc. is currently working on a master plan for over 100 acres of underutilized land to bring a new diverse neighborhood next to Historic Pullman. The Plan is looking at innovative ways to site remediation and environmental best practices. The plan builds on the area's historic character: row houses lining streets, small walkable blocks and public parks as focal points. A nursery for growing street trees is proposed to bring some jobs to the area, building on the historic tradition in Pullman where street trees were grown locally near Lake Calumet.
